## *INTERNET ACCESS*

### Who is Rev.Net?

Rev.Net was started in 1995 by Kinetic Data Systems, Inc., a local computer consulting firm, with strong business experience and a track record of excellent service. Kinetic Data Systems started Rev.Net to make the latest high tech communication resources available to the Roanoke area.

We feel staying on the cutting edge of the latest technology will provide future growth for our local community. In order to do this, we established a locally connected Internet community that puts the Valley and the World at your fingertips - and we want you to be part of this community.

### Why Rev.Net?

We provide one of the fastest, most reliable connections to the Internet. We do this via multiple T1 connections to several of the most stable backbones in the World. Our dial-up lines are connected to digital 33.6 and 56k V.90 modems. We utilize high-performance web caching, streaming satellite Internet feeds, and Akamai edge-of-the-Internet hosting to increase our speed and improve your web access. Our resource management procedures are geared towards making sure you get connected when you dial in. No busy signals, and no waiting. Our modem pool, servers and tech support are based in Roanoke, VA. As a local presence, we can provide on-site consulting and tech support when you need us. We support Windows, Mac, and Linux based systems, so we can help you get connected regardless of what you use.

When it comes to selecting an Internet service provider, we are the professional's choice. With a variety of connection options, it is easy to find one that meets your individual needs.

- 20, 160 Hour, & Unlimited Plans
- Dedicated & Dial-up 56k analog
- Dialup & Dedicated 1 & 2 Channel ISDN
- Fractional & Full T1 Data Lines

Our dial-up plans come with the following services:

- Up to 5 free e-mail accounts (Residential only)
- Free classified ad space
- Free personal web space
- 1 hour of nationwide toll-free Internet access per month (160 hours or higher)

In addition to the various connection options, we also provide the following services:

- Connecting your entire network to the Net
- Domain name creation and serving
- Additional E-mail accounts
- Domain E-mail serving
- Secondary E-mail serving
- Website design, management and/or hosting
- Authenticated Web Server Access
- Secure Server Access (SSL)
- E-commerce solutions
- Online training via the Rev.Net Institute

### How do I get connected?

If you've got a computer and a modem (14.4k or higher), all you'll need is a connection from us and connectivity software. Just fill out the application and mail it back to us along with your 1st month's payment and setup fee or give us a call and we'd be happy to answer any questions. You can also come by and pick up a Rev.Net CD, and do the setup yourself online. When you do the setup online, the setup fee is waived, and you take the rest of the month for free!

### Is the Internet easy to use?

**Yes!** Everything is Windows or Mac based, so it's just a matter of point and click. We make connecting to the Internet simple and easy, by providing pre-configured connectivity software. We have set up the Rev.Net homepage with a list of website links, sorted by category, to help you get started. There is a place to check on messages from us and local announcements. You can also check your usage time or send us e-mail right from our homepage.
